

Ynot Italian's Restaurants in Virginia Beach, Norfolk & Chesapeake

With over 21 years in business in Hampton Roads, we are a repeat "Best of" Winner in Virginia Beach, Chesapeake and Norfolk. In 2015, we were voted Best Pizza, Best Italian Restaurant, Best Family/Casual Dining, Best Beer Selection and Best Dessert in all three cities. Our menu of authentic Italian specialties, pasta, sandwiches and more is sure to please the entire family. So, come visit us and see why we're the family favorite!

If a picture is worth a thousand words, look below. On the left, 30 days of RH in red and 30 days of TEMP in blue. On the right, the next 30 days of RH and TEMP after RD FRESH has been installed.

Notice not only the drop in temperature, but the consistency of the reading... the space between the red RH and the blue TEMP after RD FRESH was installed... and RD FRESH is the opposite of "high tech"... a completely passive, 100% natural, zero footprint mineral product.

And there is more to this story....

Compressor starts:

1st 30 days the starts without RD Fresh were: 3,839

2nd 30 days with RD Fresh starts were: 3,188

A DIFFERENCE OF 651 STARTS OR A REDUCTION OF 16.9%

Hours used:

1st 30 days hours used without RD Fresh: 317

2nd 30 days hours used with RD Fresh: 190

A DIFFERENCE OF 127 HOURS OR A REDUCTION OF 40%.

Keeping food fresher, longer with no worry of the transfer of food flavor is only part of the RD FRESH story... definitely the most important aspect to the Chef... Salmon, peppers, potatoes and pasta on one rack, tomatoes, cheesecake and more on another... But a more efficiently operating, and a colder walk-in makes RD FRESH equally valuable to the Engineer...

And all of this with a completely passive, 100% natural, zero footprint mineral product.

How often do you get to do something good for the planet... And good for your bottom line...

Please contact us and let us show you how RD FRESH can save you energy, save you money, and help you to be...

"PART OF THE SOLUTION..."
